

## REPORT TO FACULTY

October 9, 1992

Kenneth O. Hall

As this is my first appearance before the faculty for the 1992-93 Academic Year, I would like to extend a very special welcome to the new faculty as well as the rest of the faculty. May I also extend congratulations to those faculty who have been promoted to the rank of Distinguished Teaching Professor, and Full Professor. Congratulations are also in order for those faculty who have been recommended by the campus for tenure and/or promotion to the rank of Associate Professor. I am especially pleased to announce that all the relatively new faculty who were recruited over the past three years have been recommended for and received reappointment.

# ENROLLMENT

P. 4

Once again the College met its enrollment with a headcount of 4130 and an FTE of 3458. There was a significant increase in the number of first-time-to-college students. Diversity has remained essentially stable.

There was an increase in the full-time vs. part-time students. While the predominant numbers of declared majors are in Business, Teacher Education, and Computer Science, there have been noticeable increases in the number of majors in Psychology, Sociology, American Studies, and Biology. Indeed, Psychology has replaced Computer Science as the program with the third highest number of declared majors. In order to continue to achieve our enrollment goals, and improve retention and graduation, additional activities will have to be undertaken in areas of admissions, registration and orientation. To this end the goal of the Fall 1992 Open House will focus on increasing the enrollment of students who have received favorable decisions on their applications to the College. Discussions are under way to increase the participation of transfer students and this, of course, will require increased participation by faculty since many of these students are at the upper division level.

A central component of these activities is the increased role that faculty will be asked to play. Specifically, the faculty will be requested to provide information to prospective majors and be available for advisement during registration and new student orientation. The New Student Orientation Program held during Summer 1992 was a success with more than 300 first-time-to-college students participating.

I am pleased to announce that the College has now responded to the request by the State Education Department for a report addressing a range of issues arising from the 1989 site visit.

The College has received notification of official State Education Department registration of a:

- B.S. in Marketing
- B.S. in Management Information Systems
- B.A. in Philosophy and Religion
- B.A. in World Cultures

ASSESSMENT

I regret to announce that Dr. Barbara Sjostrom has resigned from the College. However, she has indicated a willingness to continue to assist in compiling the 1992 Assessment Progress Report. Her responsibilities have been assigned to Dr. Gretchen Johnson. May I use this opportunity to request your cooperation in working with her to carry out her new responsibilities.

THE BUDGET

As you are aware, the 1992-93 College budget was reduced by \$852,000. In addition, there was an unexpected decline of over \$150,000 in funds allocated from the Released Time IFR. As a result, the allocation for adjuncts in the Spring will have to be reduced drastically. I have already shared this information with the Council of Conveners, and I am awaiting their response to my request for proposals for meeting the College's instructional responsibilities for the Spring.

The 1993-94 Preliminary Budget has already been prepared and will include requests for funding under the initiatives being proposed by SUNY Central. Old Westbury's request focused primarily on the freshman success, technology, and critical state needs initiatives. Among the items being requested are additional funds for content courses for first year students, additional faculty in mathematics, and laboratories for the language and psychology departments.
